

PROCESS ENGINEER- SPARE PARTS MANAGEMENT (M/W/D)

Become part of something big! Turn your ideas into beneficial technologies and have the chance to improve the quality of life around the world with us.

Innovative ideas drive us and with passion we make our contribution to a more environmentally friendly future.

The mission of crop.zone GmbH is to enable sustainable CO₂ sequestration in the soil without relying on total herbicides such as glyphosate.

The long-term goal of crop.zone is to create a platform that enables farmers to reduce their input costs and create new business models through advanced crop and soil management technologies, autonomous systems, sensors and digital management.

We offer you the opportunity to participate in an entirely new technology, as well as becoming part of a young, dynamic start-up company.

TASKS

- Set-up, creation and maintenance of a spare parts database (ERP system, PLM system) in consultation with all involved departments
- Planning and creation of spare parts documentation for agricultural machinery based on existing parts lists and 3D models
- Ensuring an optimal spare parts supply using appropriate systems
- Technical preparation of quotation for spare parts
- Coordination of incoming goods
- Preparation and creation of purchase requisitions/ orders as well as project documentation
- Deadline and cost control as well as coordination of suppliers
- Technical communication with customers and suppliers
- Technical support of the affiliated departments

REQUIREMENTS

- Completed commercial training with solid technical knowledge
- Professional experience in technical documentation
- Confident handling of SolidWorks and PLM systems
- Experience in the preparation of calculations

You're nodding inwardly right now?

Then we should talk urgently:
