

DATAMANAGER/-ANALYST

AGRO, TECHNOLOGY (M/F/D)

Become part of something big! Turn your ideas into beneficial technologies and have the chance to improve the quality of life around the world with us.

Innovative ideas drive us and with passion we make our contribution to a more environmentally friendly future.

The mission of crop.zone GmbH is to enable sustainable CO₂ sequestration in the soil without relying on total herbicides such as glyphosate.

The long-term goal of crop.zone is to create a platform that enables farmers to reduce their input costs and create new business models through advanced crop and soil management technologies, autonomous systems, sensors and digital management.

We offer you the opportunity to participate in an entirely new technology, as well as becoming part of a young, dynamic start-up company.

TASKS

- Collection and organization of technical and agronomic data from our field systems (remote, secure VPN)
- Maintenance and configuration of IOT databases and data lakes
- Creation of data analysis tool for technical and agronomic trials
- Independent execution of routine and special analyses (statistics, agricultural, marketing, technical)
- Visualization of data
- Technical support of the affiliated departments
- Good understanding of data collection and evaluation and statistics in agronomic and technical processes
- Ideally good knowledge in using systems of data collection (e.g. HiveMQ), data lakes (e.g. influxdb) and analysis (e.g. Qlik) and visualization (e.g. Grafana).
- Responsible, independent way of working and ability to work in a team
- As a creative mind with a clear focus on results, you take a committed approach
- Good command of English
- Experienced handling of MS Office applications

REQUIREMENTS

- Relevant professional degree (e.g. IT specialist with focus on process and data analysis) or university degree in the field of agriculture, technology or natural sciences
- First work experience desirable
- Good communication skills
