

A leading Europe company in Electric Crop Management

Professional, organic, residue-free.
Desiccation and crop management for
the professional farmer.

**THE ALL-IN-ONE SOLUTION FOR
THE PROFESSIONAL FARMER.**

A Leading company in Europe

How does electric crop management work?

crop.zone offers professional farmers advanced technology for **100% electric, herbicide-free crop control**. Our patented liquid volt.fuel reduces plant resistance, while the **volt.cube** generates up to 5,500 volts, destroying plant cells upon contact with our **volt.apply** applicators. Our solution is the European leader in herbicide-free potato desiccation and crop management, providing professional, biological, residue-free control.

FEATURES:

- Available in **9 or 12 meters** width
- Working speeds up to **8 km/h**
- **Residue-free, biologically** based plant protection
- Available with **84 or 112 kW** output

CUSTOMER BENEFITS

- ✓ **Quicker and more efficient desiccation and plant control** Reduction of bacterial infection
- ✓ **Improved harvesting result and quality** 100% organic certified
- ✓ **Flexible and weather-independent harvest planning** Optimal soil protection
- ✓ **Maximising the number of growing days**
- ✓ **Energy-saving and cost-effective complete solution** Comprehensive electric crop control
- ✓ **Sustainable alternative to conventional applications**

THE ALL-IN-ONE SOLUTION FOR THE PROFESSIONAL FARMER.
